Yes, that works. 1 PM Pacific.

Do you have a call-in, or shall I provide one?

James,

Can your team be available for a call at 1pm our time today? We have 3-4 people who will be participating.

Best,

Rob

Robert A. Leidy, Ph.D.

Sarah Yates from ERG has availability to talk most anytime today. Bobby Jacobsen, one of our senior project managers from our Colorado office will also join us.

Do you have a preferred time, or are any times in particular that DON'T work?

Thanks, Rob!

Hi James,

I'll be out of the office June 10-16, so it would have to be tomorrow or June 17th.

Best,

Rob

Ah, that's right - - the great office move is underway! We've been hearing about that from a lot of folks out there.

I'll coordinate with ERG and make a plan for later this week. ERG is likely waiting to hear from us to initiate that call. As well, the mechanics of the billing are still being put in place, but I thought I would get a jump-start on understanding the task.

Do things get a little calmer and more open for you, say, Wednesday?

Regarding the task, I was mostly interested in background and politics of the case. The two tech memos mentioned at the end of the task description were also not included in the materials we received, so I was interested in getting copies of those so we could better evaluate the task.

Thanks, Rob! Good luck getting settled again!

-James

Hi James,

We are moving into a new office space today so things are pretty hectic. I can try to call you tomorrow. In terms of discussing RC, we are expecting to be contacted by ERG to discuss specifics. Have you and ERG arranged a time to call us?

Best,

Rob

Wow, that's some intense flow and debris. I shared that with the rest of our crew here in Colorado. We get a lot of permittees in desert regions telling us they don't need a stormwater plan, "because it hardly ever rains here!"

When you have a moment, I'd really like to hear what the Rosemont/HudBay copper project is up to! Very interested in how they received the report.

Also, I was just informed last week that we will be supporting the attached Redwood City task that had your name listed as the contact? I was hoping to hear more about the bigger picture and situation with Redwood City.

Thanks, Rob!

Thought you river types might appreciate this amazing footage. So much for dry washes that never flow.
